

MEGHANA GUJJU

FULL-STACK DEVELOPER

Newark, New Jersey, USA | +1 (267) 688 2198 | meghana.gujju@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 8+ years building production-grade web, mobile, & distributed systems across startups & enterprises. Founded & led engineering at a GPS fleet platform scaling to 1,000+ vehicles in real time. Proven track record of measurable impact: 34% performance gains, 30% faster CI/CD cycles, and 75% reduction in production defects. Completed MS in Computer Science at NJIT (GPA 3.7) while contributing to applied research in full-stack optimization systems.

SKILLS

Languages: Python, Java, Dart, JavaScript, Kotlin, Swift, TypeScript, SQL
Frontend: Flutter, React Native, React.js, Android, iOS, Ionic
Backend: Node.js, Express.js, Django, FastAPI, Streamlit
Databases: MySQL, PostgreSQL, MongoDB, Redis, SQLite, Oracle
DevOps & Cloud: AWS, GCP, Firebase, CI/CD (GitHub Actions), Docker, Jenkins, Bitbucket

PROFESSIONAL EXPERIENCE

- Research Assistant - New Jersey Institute of Technology.**May 2025 - May 2026
 - Built MAMS, a full-stack Django web app applying single-year and multi-year optimization algorithms to allocate dredging budgets across waterway channels, delivering scenario-based analytics to decision-makers.
- Software Engineer/Solution Architect - C and S Technologies Pvt. Ltd.**February 2024 - August 2024
 - Built an on-device body measurement pipeline in Flutter using Firebase ML Kit and TensorFlow Lite, achieving sub-200ms inference latency with zero server round-trips.
 - Designed an offline-first e-commerce platform with Firestore, RESTful APIs, and PayPal integration; built a personalized recommendation engine mapping body measurements to garment SKUs.
- Director/Co-Founder(Technical Lead) - Plexus Transport Services Pvt. Ltd.**March 2016 - August 2024
 - Founded and architected Pleasehorn, a real-time GPS fleet tracking platform for Android and iOS, scaling to 1,000+ vehicles using Firebase with live telemetry dashboards.
 - Re-engineered the GPS telemetry ingestion pipeline with Firebase batch writes and connection pooling, cutting real-time data processing latency by 24% across the full fleet.
 - Built a React.js operational dashboard with live WebSocket telemetry streams; rebuilt support tooling and escalation workflows, increasing customer satisfaction by 40%.
- Mobile & Backend Developer - Turing Enterprises, Inc.**August 2023 - December 2023
 - Integrated CometChat SDK into a Flutter app for real-time messaging and push notifications; implemented OAuth 2 social login (Google, Meta, Apple) with secure token exchange and session management.
 - Built a fault-tolerant Stripe payment microservice in FastAPI and a BERT-based sentiment analysis API; achieved 100% transaction success under 100+ concurrent requests, increasing feedback response rates by 48%.
- Software Development Engineer-II - NonStop io Technologies Pvt. Ltd.**March 2022 - October 2022
 - Built a hybrid geolocation engine in React Native with GPS polling, geofencing, and adaptive sampling; achieved 90% location accuracy, contributing to a 25% NPS increase.
 - Improved app responsiveness by 34% via Firebase Analytics-driven query tuning, reduced re-renders, and pagination; implemented JWT auth, Flutter Secure Storage, and RBAC for secure client-server data.
 - Built GitHub Actions CI/CD pipelines with Docker and parallelized test suites, cutting deployment time by 30% and improving SonarQube pass rate by 15%.
- Flutter Developer/Full-Stack Developer - Around29 Digital Media Solutions.**March 2021 - March 2022
 - Built Flutter and React Native apps integrating Google Maps, Firebase Realtime Database, and Razorpay; improved First Contentful Paint by 28% via code splitting, lazy loading, and data prefetching.
 - Achieved 99.99% test coverage on critical modules using Jest; integrated Crashlytics for real-time crash reporting, driving a 75% reduction in production defects.

EDUCATION

New Jersey Institute of Technology
MS in Computer Science (GPA: 3.7)
Coursework: Data Structures & Algorithms, ML, Internet & Higher Layer Protocols, AI, Software Architecture, Data Management & System Design, Big Data, Cloud Computing, Network Security and Privacy, Capstone Project

Newark, NJ, USA
September 2024 - May 2026

Jawaharlal Nehru Technological University Hyderabad.
B.Tech in Computer Science & Engineering

Hyderabad, India
June 2015 - May 2019
